

## Simple Pump Questions.

### **Static water level.**

(Distance in well where water is first encountered.)

### **Depth of well.**

### **Well casing Diameter.**

### **Is casing PVC or metal?**

### **Frost level.**

### **Existing submersible?**

Is there an existing submersible pump in the well?

No submersible.

Yes, with discharge through pitless adaptor, i.e. Underground.

Yes, with discharge through well cap.

**IF you have a submersible, we need its depth .**

### **Will you be pumping into pressure?**

e.g. household plumbing, irrigation, pressure tank.

(SPECIAL NOTE: If you are presuming you can't pump into pressure with a hand pump.... good news.

Please ask us for info on how easy *and inexpensive* it is.)

### **Will the pump be pumping above the pump level?**

What height?

### **Interested in solar power for the pump?**
